

CONSUMER ENGAGEMENT

The Spinal Research Institute builds research collaboration and consumer engagement to **improve the lives of people with spinal cord injury**.

Through our Consumer Engagement Program we put people with **lived experience** at the forefront of research. We support them to co-design and co-deliver research that is **relevant to their needs and priorities**.

Our Consumer Engagement Program has **four aims**:

1

Inform and educate consumers about spinal cord research

2

Connect consumers to research

3

Engage consumers in all aspects of the research process

4

Facilitate participation in clinical research trials
